

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

San Pablo Site

2100-2120 San Pablo Avenue Berkeley, California 94702

Report Date: July 27, 2015 Partner Project No. 15-141328.1

Prepared for:

Spirit Living Group, LLC

126 Haight Street San Francisco, California 94102

July 27, 2015

Ali Kia Shabahangi Spirit Living Group, LLC 126 Haight Street San Francisco, California 94102

Subject: Phase I Environmental Site Assessment

San Pablo Site

2100-2120 San Pablo Avenue Berkeley, California 94702 Partner Project No. 15-141328.1

Dear Ali Kia Shabahangi:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in general conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at 415-992-3755.

Sincerely,

Jay Grenfell

National Client Manager

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in general accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Spirit Living Group, LLC for the property located at 2100-2120 San Pablo Avenue in the City of Berkeley, Alameda County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Spirit Living Group, LLC with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the southwest corner of the intersection of San Pablo Avenue and Addison Street within a mixed commercial/retail/residential area of Alameda County. Please refer to the table below for further description of the subject property:

Subject Property Data

Addresses:2100 and 2120, Berkeley, CaliforniaHistorical Addresses:2102 and 2106 San Pablo AvenueProperty Use:Vacant former U-Haul facility

Land Acreage:0.84 AcreNumber of Buildings:TwoNumber of Floors:One

Gross Building Area (SF): Approximately 1,600 SF (main office building); approximately 1,250

SF (storage building)

Date of Construction: Between 1911 and 1929 (main office building); between 1958 and

1968 (storage building)

Assessor's Parcel Number (APN): 56-1977-6-5 and 56-1977-10 **Type of Construction:** Wood-Framed and masonry

Current Tenants: Vacant

Site Assessment Performed By: Marc Hachey of Partner

Site Assessment Conducted On: July 13, 2015

The subject property is currently occupied by a former U-Haul facility featuring a small main office building at the northeast and a storage building located at the southwest corner. In addition to the current structures, the subject property is also improved with asphalt-paved parking areas, associated landscaping, drainage features, and a non-structural wall.

According to available historical sources, the subject property was formerly developed with a dwelling situated near the center of the site until at least 1950. The current office building located at the northeast corner appears to have been constructed sometime between 1911 and 1929, and the storage building between 1958 and 1968, although these dates cannot be verified with accuracy based on the historical documentation which was readily available. Tenants on the subject property include Blakemore/Falls Tire

Service (circa 1943 - circa 1975); Crocker Anglo National Bank/San Pablo Avenue Used Car Depot (circa 1960 - 1980); and Berkeley Moving Center/U-Haul (1980-Present).

The immediately surrounding properties consist of multi-family residences and a market to the north across Addison Street; a sink business to the south; shops, restaurants, and a post office to the east across San Pablo Avenue; and multi-family residences and a park to the west.

According to RWQCB's online Geotracker database, the depth and direction of groundwater in the vicinity of the subject property is inferred to be approximately 10-20 feet below ground surface (bgs) and flows toward the west.

Findings

A recognized environmental condition (REC) refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property; due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

Partner did not identify recognized environmental conditions during the course of this assessment.

A controlled recognized environmental condition (CREC) refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

The subject property, identified as U-Haul #710-52 at 2100 San Pablo Avenue, reported a release of gasoline and waste oil/motor oil in 1996. The release was caused by two former underground storage tanks located onsite (one gasoline and one motor oil), and was reported to the lead agency (City of Berkeley and RWQCB) at the time of discovery. Confirmation soil samples collected from the tank excavation found minimal petroleum hydrocarbon impacts to the subsurface. The excavations were 7 to 13 feet in depth, and because groundwater was not encountered in the excavations, groundwater samples were not collected for analysis.

A supplement subsurface investigation was conducted onsite in 2005 which included the advancement of four soil borings. Two borings were advanced within the area of the former USTs, and two were advanced adjacent to and downgradient of the USTs. Representative soil and groundwater samples were collected, and the results indicated minimal, residual impacts remained onsite from the former USTs. The City of Berkeley provided oversight of the investigation, and requested case closure based on the limited horizontal and vertical extent of subsurface impacts from the removed USTs, and low to insignificant human and environmental health concerns exhibited onsite.

As a result, the RWQCB issued a No Further Action (NFA) letter to U-Haul (responsible party) on April 8, 2008. According to the NFA letter, the property is flagged for future development by the

City of Berkeley due to the residual concentrations of petroleum-impacted soil and/or groundwater remaining onsite (a copy of the NFA letter is included in Appendix B of this report). Based on the removal of the tanks, the analytical results, the regulatory closure, and the property use restriction currently in-place, the former USTs are considered a controlled recognized environmental condition.

A historical recognized environmental condition (HREC) refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

 Partner did not identify historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

• Due to the age of the subject property buildings, there is a potential that asbestos-containing material (ACM) and/or lead-based paint (LBP) are present. Overall, no ACMs were readily present in the buildings and all painted surfaces were observed in good condition and do not pose a health and safety concern to the occupants of the subject property at this time. If present, suspect ACMs would need to be sampled to confirm the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 2100-2120 San Pablo Avenue in the City of Berkeley, Alameda County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property. Based on the conclusions of this assessment, Partner recommends the following:

• It is our understanding that the subject property is slated for residential redevelopment with a possible below-grade parking structure. There is currently residual soil contamination associated with the former leaking underground storage tank (LUST) case. A below-grade parking structure would generate a large volume of excess soil which would need to be off-hauled offsite to another location. It is recommended that a management plan and oversight of the parking structure excavation be performed, including confirmation soil sampling of the export soil to ensure that potentially impacted soil is managed both onsite and at the receiving location.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in general conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 2100-2120 San Pablo Avenue in the City of Berkeley, Alameda County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "all appropriate inquiry into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential

exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Spirit Living Group, LLC engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Spirit Living Group, LLC. Either

verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

This report has been completed under specific Terms and Conditions relating to scope, relying parties, limitations of liability, indemnification, dispute resolution, and other factors relevant to any reliance on this report. Any parties relying on this report do so having accepted the Terms and Conditions for which this report was completed. A copy of Partner's standard Terms and Conditions can be found at http://www.partneresi.com/terms-and-conditions.php.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past or current owners, operators and occupants were not reasonably ascertainable, which constitutes a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner submitted Freedom of Information Act (FOIA) requests to Berkeley Environmental Health Services (BEHS) and Berkeley Permit Service Center (BPSC) for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property. As of this writing, these agencies have not responded to Partner's request. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 2100 and 2120 San Pablo Avenue in Berkeley, California is located on the southwest corner of the intersection of San Pablo Avenue and Addison Street. According to the Alameda County Assessor and key site manager, the subject property is legally described as APN 56-1977-6-5 and 56-1977-10, and ownership is currently vested in U-Haul.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently occupied by a former U-Haul facility featuring a small main office building at the northeast and a storage building located at the southwest corner. Both buildings are single-story. In addition to the current structures, the subject property is also improved with asphalt-paved parking areas, associated landscaping, drainage features, and a non-structural wall.

The subject property is designated for commercial development by the City of Berkeley.

The subject property was identified as a LUST, SWEEPS UST, and HIST UST site in the regulatory database report, as further discussed in Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial/retail/residential area of Alameda County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

North: Addison Street beyond which is Mi Tierra Foods (2082 San Pablo Avenue) and multi-family

residences 1035 Addison Street

South: The Sink Factory (2140 San Pablo Avenue)

East: San Pablo Avenue beyond which is Country Cheese Co. (2101 San Pablo Avenue); US Postal Service (2111 San Pablo Avenue); ACME Bar and Co. (2115 San Pablo Avenue); Keetsa

Mattresses (2117 San Pablo Avenue); Gaumenkitzel (2121 San Pablo Avenue); and Beyond

Repair (2147 San Pablo Avenue)

West: Multi-family residences and a park

The adjacent property to the southeast was identified as EDR Hist. Auto Station sites (2147 San Pablo Avenue), and a property to the east (2121 San Pablo Avenue) was identified as a RCRA-SQG site in the regulatory database report discussed in Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Oakland West, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the

subject property is located at approximately 55 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the west. The subject property is depicted on the 1993 map as with an area of dense urban development.

A copy of the 1993 topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater in the vicinity of the subject property is inferred to flow toward the northwest. The nearest surface water in the vicinity of the subject property is the San Francisco Bay located approximately 0.7 mile and geographical west of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the East Bay Municipal Utility District serves the subject property vicinity. According to the 2014 Water Quality Report, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of Berkeley are from the 577-square mile watershed of the Mokelumne River on the western slope of the Sierra Nevada.

According to a previous subsurface investigation conducted on a nearby property (950 University Avenue and LUST Case T0600101334), the depth of groundwater in the vicinity of the subject property is inferred to be approximately 10 to 20 feet below ground surface (bgs).

2.4.3 Geology/Soils

The subject property is located within the Coast Ranges geomorphic province of Northern California. The Coast Ranges are characterized as parallel mountain ranges and valleys displaced by strike-slip earthquake faults. The site is underlain by Holocene-aged alluvial soils consisting of mixed gravel, sand, silt and clay.

Based on information obtained from the United States Department of Agriculture (USDA) Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as urban land.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06001C0056G, dated August 3, 2009, the subject property appears to be located in Zone X, an area located outside of the 100-year and 500-year flood plains.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information				
Period/Date	Source	Description/Use		
circa 1900-	Sanborn Maps	Developed with a dwelling and a woodworking and		
circa 1915		blacksmith shop building at the north end		
circa 1920-	Aerial Photographs, City	Developed with the current building at the		
circa1975	Directories, Sanborn Maps	northeast property corner, and the dwelling. The		
		northern portion of the property is occupied and		
		operated by a tire service business		
circa 1960 -	Aerial Photographs, City	Developed with the two current buildings and		
1980	Directories, Sanborn Maps	occupied by a used automobile dealership		
1980-Present	Aerial Photographs, Building	Developed similarly to today and occupied by		
	Records, City Directories, Onsite	Berkeley Moving Center followed by U-Haul		
	Observations, Sanborn Maps			

Tenants on the subject property include Blakemore/Falls Tire Service (circa 1943 - circa 1975); Crocker Anglo National Bank/San Pablo Avenue Used Car Depot (circa 1960 - 1980); and Berkeley Moving Center/U-Haul (1980-Present). Potential environmental concerns were identified in association with the current or former use of the subject property, as further discussed in Section 5.2.6.

3.1 **Aerial Photograph Review**

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) on July 9, 2015. The following observations were noted to be visible on the subject property and adjacent properties during the aerial photograph review:

Date: 1939	Scale: 1"=500'
Subject Property:	The scale and clarity of the image is such that discerning the site features is not
	possible
North:	Developed with the current structures across Addison Street
South:	Developed with the current commercial building
East:	Appears to be developed with the majority of the current commercial structures
	across San Pablo Avenue, except for the commercial building adjacent to the
	southeast
West:	Appears to be developed with the majority of the residential structures, and there
	are former structures present to the southwest in the location of the current park.

Date: 1946		Scale:	1″=500′
Subject Property:	Appears to be developed with at least two rectar unknown usage	ngular-shaped	structures of
North:	No significant changes visible		
South:	No significant changes visible		
East:	No significant changes visible		
West:	No significant changes visible		

Date: 1958 Scale: 1"=500'

Subject Property: There appears to be structures to the south and north (possibly the current

buildings), and parked vehicles in the center of the subject property

North: No significant changes visible
South: No significant changes visible
East: No significant changes visible
West: No significant changes visible

Date: 1968 Scale: 1"=500'

Subject Property: The subject property appears to be developed similarly to today

North: No significant changes visible South: No significant changes visible East: No significant changes visible West: No significant changes visible

Date: 1974 Scale: 1"=500'

Subject Property: The two current buildings are visible, as well as a large, irregularly-shaped structure

located at the center of the site

North: No significant changes visible

South: No significant changes visible

East: No significant changes visible

West: No significant changes visible, aside from the buildings to the southwest have been

removed

Date: 1982 Scale: 1"=500'

Subject Property: The two current buildings are visible, and the center of the site is occupied by what

appears to be a few scattered structures of unknown usage or possibly large parked

vehicles

North: No significant changes visible

South: No significant changes visible

East: No significant changes visible

West: No significant changes visible

Date: 1993 Scale: 1"=500'

Subject Property: The two current buildings are visible, and the center of the site appears to be void

of additional structures and features several parked vehicles

North: No significant changes visible
South: No significant changes visible

Copies of reviewed aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from EDR on July 8, 2015. The following observations were noted to be depicted on the subject property and adjacent properties during the fire insurance map review:

Date: 1903

Subject Property: Developed with a dwelling near the center of the site, and a blacksmith and

woodworking shop building at the northeast corner. There appears to be a water

tank and shed structure along the western edge.

North: Developed with a dwelling and blacksmith shop across Addison Street

South: Undeveloped

East: Undeveloped across San Pablo Avenue **West:** Developed with at least one dwelling

Date: 1911

Subject Property:No significant changes depictedNorth:No significant changes depictedSouth:No significant changes depictedEast:No significant changes depictedWest:No significant changes depicted

Date: 1929

Subject Property: The dwelling is still present near the center of the site, and the current building at

the northeast corner (including a western extension no longer present) is present

and occupied by a "Tire and Vulcanizing" business with machine shop

North: Developed with the current commercial building across Addison Street

South: Developed with the current commercial building

East: Developed with at least four commercial buildings across San Pablo Avenue,

including an auto repair business and auto wrecking business to the east/southeast

West: Developed with dwellings to the west/northwest, and a cider business and

warehouse to the west/southwest

Date: 1950

Subject Property:No significant changes depictedNorth:No significant changes depictedSouth:No significant changes depictedEast:No significant changes depictedWest:No significant changes depicted

Date: 1980

Subject Property: Developed with both of the current buildings, and the site is occupied by a used

automobile sales business

North: No significant changes depicted South: No significant changes depicted East: No significant changes depicted

West: The commercial buildings to the west/southwest have been replaced with the

current park

Copies of reviewed Sanborn Maps are included in Appendix B of this report.

3.3 City Directories

Partner reviewed historical city directories obtained from EDR on July 8, 2015 for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for 2100, 2106, and 2120 San Pablo Avenue (Subject Property)

Years	Occupant Listed
1943-	Residential listings (2106 San Pablo Avenue)
1950	
1943-	Blakemore/Falls Tire Service (2100 San Pablo Avenue)
1975	
1962	Crocker Anglo National Bank/San Pablo Avenue Used Car Depot (2106 San Pablo Avenue)
1975	G&M Nursery and Landscaping (2120 San Pablo Avenue)
1980-	Berkeley Moving Center (2100 San Pablo Avenue)
1986	
1992-	U-Haul (2100 San Pablo Avenue)
2013	

Based on the city directory review, no environmentally sensitive listings were identified for the subject property addresses.

City Directory Search for Adjacent Properties

Years	Occupant Listed
1928	Piggly Wiggly Pacific Co Inc. (2101 San Pablo Avenue)
1943	St. Helena Wine Co (2101 San Pablo Avenue); Stores (2111 San Pablo Avenue)
1943-	, , , , , , , , , , , , , , , , , , , ,
	Berthelsen's Garage/Scandia Auto Body (2121 San Pablo Avenue); various auto-related
1986	business listings (2147 San Pablo Avenue)
1950-	Ottino's Market (2082 San Pablo Avenue)
1962

2008	Pablo Avenue)
1986-	The Sink Factory (2140 San Pablo Avenue)
2013	
2006-	Baldwin Brass Center/Belmont Hardware (2119 San Pablo Avenue)
2013	
2000-	Mi Tierra Foods (2082 San Pablo Avenue)
2013	THE HOLL TOOKS (2002 SULL LUBIO / WOLLD)
2008	US Postal Service (2111 San Pablo Avenue)
2008	
2013	Gaumenkitzel (2121 San Pablo Avenue)

Based on the city directory review, no environmentally sensitive listings were identified for the adjacent property addresses.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from EDR on July, 2015. The following observations were noted to be depicted on the subject property and adjacent properties during the topographic map review:

Date: 1949

Subject Property: No structures depicted; dense urban area

North: No structures depicted; dense urban area across Addison Street

South: No structures depicted; dense urban area

East: No structures depicted; dense urban area across San Pablo Avenue

West: No structures depicted; dense urban area

Date: 1959

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

Regulatory Agency Data

Name of Agency: California Office of Environmental Health Hazard Assessment

(OEHHA)

Point of Contact: Ms. Monet Vela

Agency Address: 1001 | Street, Sacramento, California

Agency Phone Number: 916-323-2610 **Date of Contact:** July 7, 2015

Method of Communication: Email

Summary of Communication: No records regarding hazardous substance use, storage or releases,

or the presence of USTs and AULs on the subject property were on

file with the OEHHA.

4.1.2 Health Department

Regulatory Agency Data

Name of Agency: Berkeley Environmental Health Services (BEHS)

Point of Contact: Not provided

Agency Address: 2180 Milvia Street, 2nd Floor, Berkeley, CA

Agency Phone Number:(510) 981-5310Date of Contact:July 7, 2015

Method of Communication: Email

Summary of Communication: As of the date of this report, Partner has not received a response

from the BEHS for inclusion in this report.

4.1.3 Fire Department

Regulatory Agency Data

Name of Agency: Berkeley Fire Department (BFD)

Point of Contact: Samella Stover

Agency Address: 2100 Martin Luther King Way, Berkeley, CA

Agency Phone Number: (510) 981-3473

Date of Contact: July 7, 2015

Method of Communication: Email

Summary of Communication: No records regarding hazardous substance use, storage or releases,

or the presence of USTs and AULs on the subject property were on

file with the BFD.

4.1.4 Air Pollution Control Agency

Regulatory Agency Data

Name of Agency: Bay Area Air Quality Management District (BAAQMD)

Point of Contact: Ms. Rochelle Reed

Agency Address: 939 Ellis Street, San Francisco, California

Regulatory Agency Data

Agency Phone Number: 415-771-6000

Date of Contact: July 7, 2015

Method of Communication: Email

Summary of Communication: No Permits to Operate (PTO), Notices of Violation (NOV), or Notices

to Comply (NTC) or the presence of AULs, dry cleaning machines, or

USTs were on file for the subject property with the BAAQMD.

4.1.5 Regional Water Quality Agency

Regulatory Agency Data

Name of Agency: San Francisco Bay Area Regional Water Quality Control Board

(SFBARWQCB)

Point of Contact: Ms. Melinda Wong

Agency Address: 1515 Clay Street, Oakland, California

Agency Phone Number: 510-622-2300

Date of Contact: July 7, 2015

Method of Communication: Online

Summary of Communication: The subject property is listed within the online Geotracker database

managed by the RWQCB as a closed LUST site. The records available

within the database are discussed in Section 5.2.6.

4.1.6 Department of Toxic Substances Control

Regulatory Agency Data

Name of Agency: California Department of Toxic Substances Control – Berkeley Region

(DTSC)

Point of Contact: Mr. Carl Rose

Agency Address: 700 Heinz Avenue, Berkeley, California

Agency Phone Number:925-931-5300Date of Contact:July 7, 2015Method of Communication:Online

Summary of Communication: The subject property is not listed within the online ENVIROSTOR

database managed by the DTSC.

4.1.7 Building Department

Regulatory Agency Data

Name of Agency: Berkeley Permit Service Center (BPSC)

Point of Contact: Not provided

Agency Address: 2120 Milvia Street, Berkeley, CA

Agency Phone Number: (510) 981-7500

Date of Contact: July 7, 2015

Method of Communication: Online/Email

Summary of Communication: As of the date of this report, Partner has not received a response

from the BPSC for inclusion in this report; however, records were available online for review, as further discussed in the following

table.

Building Records Reviewed for 2100 San Pablo Avenue (Subject Property)

YearOwner/ApplicantDescription2006Not providedDrywall repair2006Not providedExterior wall repair

4.1.8 Planning Department

Regulatory Agency Data

Name of Agency: Berkeley Land Use Planning (BLUP)

Point of Contact: Not provided

Agency Address: 2120 Milvia Street, Berkeley, CA

Agency Phone Number: (510) 981-7500 **Date of Contact:** July 7, 2015

Method of Communication: Email

Summary of Communication: According to records reviewed, the subject property is designated

for commercial development by the City of Berkeley.

4.1.9 Oil & Gas Exploration

Regulatory Agency Data

Name of Agency: California Division of Oil, Gas and Geothermal Resources (DOGGR)

Point of Contact: Not applicable

Agency Address: Sacramento, California

Agency Phone Number: Not applicable

Date of Contact: July 7, 2015

Method of Communication: Online

Summary of Communication: According to DOGGR, no oil or gas wells are located on or adjacent

to the subject property.

4.1.10 Assessor's Office

Regulatory Agency Data

Name of Agency: Alameda County Assessor (ACA)

Point of Contact: Not applicable

Agency Address: 1221 Oak St, Oakland, California

Agency Phone Number: 510-272-3787

Date of Contact: July 7, 2015

Method of Communication: Online

Summary of Communication: According to records reviewed, the subject property is identified by

Assessor Parcel Numbers (APNs) 56-1977-6-5 and 56-1977-10, and is currently owned by U-Haul. The subject property consists of two adjacent parcels approximately 0.84 acre in total size. No records regarding property ownership, building and utility information for

the subject property were on file with the ACA.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by EDR. Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data				
Database	Search Radius	Subject	Adjacent	Sites of
	(mile)	Property	Properties	Concern
Federal NPL or Delisted NPL Site	1.00	N	Ν	N
Federal CERCLIS Site	0.50	N	Ν	N
Federal CERCLIS-NFRAP Site	0.50	Ν	Ν	N
Federal RCRA CORRACTS Facility	1.00	N	Ν	N
Federal RCRA TSDF Facility	0.50	Ν	Ν	N
Federal RCRA Generators Site (LQG, SQG,	0.25	Ν	Y	N
CESQG)				
Federal IC/EC Registries	0.50	Ν	Ν	N

EDR US Hist Auto Station	0.25	N	Y	N
EDR US Hist Cleaners	0.25	N	N	N

4.2.2 Subject Property Listings

The subject property is identified as a LUST, HIST UST and SWEEPS UST site in the regulatory database report, as discussed below:

• The subject property, identified as U-Haul #710-52 at 2100 San Pablo Avenue, reported a release of gasoline/waste oil/motor oil/hydraulic fluid/lubricating in 1996. The release was caused by two

former underground storage tanks located onsite (one gasoline and one motor oil), and was reported to the lead agency (City of Berkeley and RWQCB) at the time of discovery. The responsible party is identified as U-Haul, and regulatory closure was obtained on April 4, 2008. Based on the analytical data, removal of petroleum-impacted subsurface, and the regulatory status, this listing is not expected to represent a significant environmental concern. The LUST case is discussed in detail in Section 5.2.6.

4.2.3 Adjacent Property Listings

An adjacent property to the southeast was identified as EDR Hist. Auto Station sites, and a property to the east was identified as a RCRA-SQG site (also a former automobile service/repair business, not listed as an EDR Hist. Auto Station site) in the regulatory database report. Based on the lack of historical releases or reported onsite contamination, as well as the fact that these former automobile service businesses are no longer located at their respective sites, these listings are not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.4 Sites of Concern Listings

No sites of concern are identified in the regulatory database report.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.5 Orphan Listings

No orphan listings are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from Spirit Living Group, LLC (User of this report).

User Responsibilities				
Item	Provided By User	Not Provided By User	Discussed Below	Does Not Apply
Environmental Pre-Survey Questionnaire		-	X	
Title Records, Environmental Liens, and AULs			X	
Specialized Knowledge			X	
Actual Knowledge			X	
Valuation Reduction for Environmental Issues			X	
Identification of Key Site Manager	Section 5.1.3			
Reason for Performing Phase I ESA	Section 1.1			
Prior Environmental Reports	Section 5.2.6			
Other		X		

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property, identified as U-Haul, was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User. The information requested was not received prior to the issuance of this report. Because the Report User (Client) is a lender, it is understood that the Report User would not have knowledge of the property that would significantly impact our ability to satisfy the objectives of this assessment. The lack of this information is not considered to represent a significant data gap.

5.1.3 Interview with Key Site Manager

Mr. Ali Kia Shabahangi, key site manager, indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Mr. Shabahangi, the subject property is currently owned by U-Haul. Mr. Shabahangi indicated that he is in the process of purchasing the property for redevelopment into multi-family residential units. Mr. Shabahangi was unfamiliar with the site history. Mr. Shabahangi further stated that there are no USTs, ASTs, clarifiers, oil/water separators, groundwater monitoring wells, or hazardous substance use/storage/generation on the subject property to the best of his knowledge.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did/did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

The following information was provided to Partner for review during the course of this assessment:

<u>Underground Storage Tank Removal and Closure Report, Blaes Environmental Management, Inc. (July 31, 1996)</u>

Blaes Environmental Management, Inc. (Blaes) prepared this report on behalf of U-Haul International. The report summarized the onsite activities conducted to remove two underground storage tanks from the subject property. The tanks were both located adjacent to and south/southwest of the main office building within the northeast quadrant of the site. The 550-gallon waste oil tank, 10,000-gallon gasoline tank, and associated dispensers and piping were removed in June of 1996. Confirmation soil samples were collected from the bottom of both tanks and piping, as well as from the soil stockpile resulting from the excavations in the area of work. Only minor visible/olfactory evidence of contamination was observed beneath the fill tube of the waste oil tanks, and both tanks were observed to be in good condition with no evidence of holes.

The soil samples collected from the bottom of the tank excavations were at approximately 13-feet deep (gasoline tank), and 7-feet (waste oil), and groundwater was not encountered in either excavation. The soil samples were analyzed for TPH, Halogenated Volatile Organic Compounds, and TCLP Metals.

The laboratory results indicated that the soil samples collected below the gasoline tank did not contain detectable concentrations of TPH, and the results beneath the waste oil tank contained a TPH concentration of 8,300 ppm but did not contain detectable concentrations of Halogenated Volatile Organics. The laboratory results from the TCLP Metals analyses indicated that the waste oil tank soil sample did not contain metals above the maximum allowable limits. The analysis also indicated that the soil samples collected along the product piping run and under the dispenser contained TPH concentrations of 2.0 and 3.6 parts per million, respectively. Further, the soil sample collected from the stockpile contained a TPH concentration of 5.8 parts per million.

Initial Site Assessment Report, Blaes Environmental Management, Inc. (April 21, 2005)

Blaes prepared this report on behalf of U-Haul International. The report summarized a limited soil and groundwater investigation conducted at the subject property on March 24 and 25, 2005. The purpose of the site investigation was to determine the potential vertical and horizontal extent of hydrocarbon impacts to the subsurface from the former USTs removed in 1996. Two borings were advanced near the center of the former USTs, and two additional borings were advanced adjacent to and downgradient (west) of the former tanks.

Representative soil and groundwater samples were collected from the borings for analysis, which included TPHd, TPHmo, TPHg, and VOCs. The results indicated maximum soil concentrations of 2.3 and 3.2 ppm of TPHd beneath the former waste oil tank, with non-dectable concentrations of hydrocarbon analytes for all other samples analyzed. Groundwater samples collected from the two downgradient borings were found to have MTBE concentrations of 0.77 and 76 ug/L, and one of the downgradient borings contained 43 ug/L of TPHg.

<u>Request for No Further Action, City of Berkeley Planning and Development Department – Toxics Management Division (February 28, 2008)</u>

The City of Berkeley Planning and Development Department – Toxics Management Division (TMD) issued this letter requesting site closure for the subject property, addressed to the Regional Water Quality Control Board (RWQCB). The request for closure was based on the limited horizontal and vertical extent of subsurface impacts from the removed USTs, and low to insignificant human and environmental health concerns exhibited onsite. The TMD indicated they are placing a notice or flat within the City's building permit system to indicate the presence of residual onsite contamination. At the time of issuance of this letter, future redevelopment of the subject property would require review by TMD prior to issuing building or construction permits.

The subject property was granted LUST case closure by the RWQCB in their letter dated April 8, 2008.

Copies of pertinent pages reviewed are included in Appendix B of this report.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was overcast. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data

Site Assessment Performed By: Marc Hachey
Site Assessment Conducted On: July 13, 2015

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 2100 and 2120 San Pablo Avenue (Subject Property) Name Title/Role Contact Number

Name Title/Role Contact Number Site Walk*
Yes/No

Ali Kia Shahahangi Kay Sita Managar (415) 4/5 2005

Ali Kia Shabahangi Key Site Manager (415) 465-2905 Yes

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste is currently not generated at the subject property.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City of Berkeley services the subject property vicinity. No wastewater treatment facilities or septic systems are observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces towards storm water drains located throughout the subject property and in the public right of way. Site storm water from roofs, landscaped areas, and paved areas is directed to on-site concrete swales, which drain to the public right of way, and to on-site storm water drains. The subject property is connected to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Department of Agriculture or United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

^{*} Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity/ natural gas provided by Pacific Gas & Electric. The mechanical system is comprised of a rooftop-mounted packaged electric/natural gas split HVAC units located on the main office building. Hot water is provided by an individual natural gas/electric water heater located in the office building.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial wastewater is currently generated at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No hazardous substances or petroleum products were observed on the subject property during the site reconnaissance.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

No potential PCB-containing equipment (transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, etc.) was observed on the subject property during Partner's reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property buildings were constructed in prior to 1968. Partner has conducted a limited, visual evaluation of accessible areas for the presence of suspect ACMs at the subject property. The objective of this visual survey was to note the presence and condition of suspect ACM observed. No suspect ACM were observed in either of the onsite buildings.

The limited visual survey consisted of noting observable materials (materials which were readily accessible and visible during the course of the site reconnaissance) that are commonly known to potentially contain asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the site; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to give the User an indication if significant (significant due to quantity, accessibility, or condition) potential sources of ACM or PACM are present at the subject property. Additional sampling, assessment, and evaluation will be warranted for any other use.

Partner was not provided building plans or specifications for review, which may have been useful in determining areas likely to have used ACM.

According to the US EPA, ACM and PACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated

by renovation, demolition, or deteriorating material condition. Prior to any disturbance of the construction materials within this facility, a comprehensive ACM survey should be conducted.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm² (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated.

Based on the age of the subject property buildings (pre-1978), there is a potential that LBP is present. Interior and exterior painted surfaces were observed in good condition and therefore not expected to represent a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated.

Actual material samples would need to be collected in order to determine if LBP is present.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones				
EPA Zones	Average Predicted Radon Levels	Potential		
Zone 1	Exceed 4.0 pCi/L	Highest		
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate		
Zone 3	Less than 2.0 pCi/L	Low		

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the East Bay Municipal Utility District (EBMUD) serves the subject property vicinity. According to the 2014 Water Quality Report, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of Berkeley are from the 577-square mile watershed of the Mokelumne River on the western slope of the Sierra Nevada. According to the Water Quality Report, water supplied to the

subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g. in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g. ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property buildings for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 FINDINGS AND CONCLUSIONS

Findings

A recognized environmental condition (REC) refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property; due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

 Partner did not identify recognized environmental conditions during the course of this assessment.

A controlled recognized environmental condition (CREC) refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

• The subject property, identified as U-Haul #710-52 at 2100 San Pablo Avenue, reported a release of gasoline and waste oil/motor oil in 1996. The release was caused by two former underground storage tanks located onsite (one gasoline and one motor oil), and was reported to the lead agency (City of Berkeley and RWQCB) at the time of discovery. Confirmation soil samples collected from the tank excavation found minimal petroleum hydrocarbon impacts to the subsurface. The excavations were 7 to 13 feet in depth, and because groundwater was not encountered in the excavations, groundwater samples were not collected for analysis.

A supplement subsurface investigation was conducted onsite in 2005 which included the advancement of four soil borings. Two borings were advanced within the area of the former USTs, and two were advanced adjacent to and downgradient of the USTs. Representative soil and groundwater samples were collected, and the results indicated minimal, residual impacts remained onsite from the former USTs. The City of Berkeley provided oversight of the investigation, and requested case closure based on the limited horizontal and vertical extent of subsurface impacts from the removed USTs, and low to insignificant human and environmental health concerns exhibited onsite.

As a result, the RWQCB issued a No Further Action (NFA) letter to U-Haul (responsible party) on April 8, 2008. According to the NFA letter, the property is flagged for future development by the City of Berkeley due to the residual concentrations of petroleum-impacted soil and/or groundwater remaining onsite (a copy of the NFA letter is included in Appendix B of this report). Based on the removal of the tanks, the analytical results, the regulatory closure, and the property use restriction currently in-place, the former USTs are considered a controlled recognized environmental condition.

A historical recognized environmental condition (HREC) refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been

addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

• Partner did not identify historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

Due to the age of the subject property buildings, there is a potential that asbestos-containing
material (ACM) and/or lead-based paint (LBP) are present. Overall, no ACMs were readily present
in the buildings and all painted surfaces were observed in good condition and do not pose a
health and safety concern to the occupants of the subject property at this time. If present,
suspect ACMs would need to be sampled to confirm the presence or absence of asbestos prior to
any renovation or demolition activities to prevent potential exposure to workers and/or building
occupants.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 2100-2120 San Pablo Avenue in the City of Berkeley, Alameda County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property. Based on the conclusions of this assessment, Partner recommends the following:

• It is our understanding that the subject property is slated for residential redevelopment with a possible below-grade parking structure. There is currently residual soil contamination associated with the former leaking underground storage tank (LUST) case. A below-grade parking structure would generate a large volume of excess soil which would need to be off-hauled offsite to another location. It is recommended that a management plan and oversight of the parking structure excavation be performed, including confirmation soil sampling of the export soil to ensure that potentially impacted soil is managed both onsite and at the receiving location.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 2100-2120 San Pablo Avenue in the City of Berkeley, Alameda County, California in general conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

Planning and Development Department Toxics Management Division February 28, 2008

Amerco Real Estate Company / U-Haul International, Inc. Attn: Mr. Robert Fraley 2727 North Central Avenue Phoenix, Arizona 85004

Subject:

Request for No Further Action U-Haul - 2100 San Pablo Avenue

Dear Mr. Fraley,

The City of Berkeley, Toxics Management Division (TMD), has reviewed the "Initial Site Assessment Report" by Blaes Environmental Management, Inc. dated April 21, 2005. The report documents the investigation of environmental conditions related to the former use of one 500-gallon underground waste oil tank and one 10,000-gallon underground gasoline storage tank. Soil and groundwater samples were collected in accordance with a TMD-approved sampling plan. The results of the investigation indicate low to non-detected concentrations of gasoline and diesel-range petroleum hydrocarbon constituents. The residual concentrations suggest a very low to insignificant potential for impacts to groundwater, other environmental resources, or human health. The TMD requires no further investigative or remedial action with regard to the removed tank.

The TMD will place a notice (flag) in the City of Berkeley's building permit system to indicate there is residual contamination in the subsurface. The flag will consist of a notice requiring building permits to be routed through the TMD for review and approval prior to issuing building, construction, or other permits for the property. The applicant or owner may incur additional construction or other costs due to soil or water management requirements, and/or controls to ensure worker, community and other environmental protections imposed by the TMD for future development of the site. Hourly charges for TMD's review and oversight of permits or construction activities may also be imposed.

The TMD determination of no further action is based on the subsurface conditions as presented in the analytical results and on TMD's observations during site visits and inspections. This determination is further based on the existing site conditions and an understanding that the site will remain developed for use consistent with current City of Berkeley zoning requirements. Significant changes in the site conditions or site development should be reported to the TMD to allow review of this determination.

FAX: (510) 981-7470

Mr. Robert Fraley Page 2 of 2

The TMD will forward an invoice for four hours of staff time, \$600.00 for work related to this project. Staff time was used to update State (GeoTracker) and TMD project databases, create a parcel note in the City's building permit database, to review the referenced report, and to prepare and distribute this letter. If you have any questions, please contact me at (510) 981-7467.

Sincerely,

Geoffery A. Fiedler

Site Closure Referral

2100 San Pablo Avenue, Berkeley

Dear Ms. McCaulou:

The City of Berkeley, Toxics Management Division (TMD) has prepared the attached Case Closure Summary forms. Referenced reports have been uploaded to GeoTracker. The TMD recommends this site be considered for no further remedial action or investigation. Site conditions suggest the residual total petroleum hydrocarbon constituents detected at the time the USTs were removed are very limited in concentration and are of limited extent in soil or groundwater. The reported site conditions indicate a low to insignificant human or environmental health concern. Residual soil and groundwater constituents are primarily limited to on-site areas, currently in commercial use.

The TMD has placed a notice (flag) in the City of Berkeley's building permit system to indicate there is residual contamination in the subsurface. The flag consists of a notice requiring building permits to be routed through the TMD for review and mitigations, as needed, prior to issuing building, construction, or other permits for the property.

Please give me a call if you have questions.

Sincerely.

Geoffery A. Fiedler

Hazardous Materials Specialist, II

Closure Letter for 2100 San Pablo Avenue, Berkeley, Alameda County

Dear Mr. Fraley:

This letter confirms the completion of a site investigation and corrective action for the underground storage tank formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank(s) are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tank(s) site is in compliance with the requirements of subdivisions (a) and (b) of Section 25296.10 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.3 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required. This notice is issued pursuant to subdivision (g) of Section 25296.10 of the Health and Safety Code.

If you have any questions, please contact Cherie McCaulou of my staff at (510) 622-2342 or cmccaulou@waterboards.ca.gov.

Sincerely,

Bruce H. Wolfe

BLAES PROJECT #002-71052-02

April 21, 2005

This Site Characterization Report has been prepared by Blaes Environmental Management, Inc. (Blaes Environmental) for Amerco Real Estate Company/U-Haul International (Amerco/U-Haul) as it pertains to U-Haul Facility #710-52 located at 2100 San Pablo Avenue in Berkeley, California. Our professional services have been performed using that degree of care and skill ordinarily exercised under similar circumstances by other geologists, engineers, and environmental consultants practicing in this field. No other warranty, express or implied, is made as to the professional advice in this report. Any use of or reliance on this report by a third party shall be at such a party's sole risk.

Blaes Environmental can offer no assurances and assumes no responsibility for site conditions or activities outside the scope of the inquiry requested by Amerco/U-Haul as outlined in this document. It should be understood that Blaes Environmental has relied on the accuracy of documents, oral information, and other materials and information provided by Amerco/U-Haul and other associated parties. Any subsequent modification, revision or verification of this report must be provided in writing by Blaes Environmental.

1.0 INTRODUCTION

This report documents the procedures and findings of a limited soil and groundwater site characterization program conducted at U-Haul Facility #710-52 located at 2100 San Pablo Avenue in Berkeley, California (Figure 1). The site characterization investigation was conducted on March 24 and 25, 2005, by Blaes Environmental Management, Inc. (Blaes Environmental) at the request of the City of Berkeley - Toxics Management Division (TMD) (Appendix A) and the authorization of Amereo Real Estate Company/U-Haul International (Amereo/U-Haul).

1.1 PROGRAM OBJECTIVE

The objective of the investigation was to determine the potential extent and concentration of petroleum hydrocarbons that may have impacted subsurface soil and/or groundwater in the area of a former 550-gallon waste-oil underground storage tank (UST) and a former 10,000-gallon fuel UST at the site.

1.2 SCOPE OF WORK

The site characterization program involved four tasks including: (1) drilling four soil borings; (2) collecting soil and/or groundwater samples from each boring; (3) laboratory analysis of the soil and groundwater samples collected at the site; and (4) preparation of a report of the findings of the program.

1.3 PROJECT TEAM

The project team consisted of Blaes Environmental of Phoenix, Arizona; Cascade Drilling, Inc. of Rancho Cordova, California; and Sequoia Analytical, Inc. of Sacramento, California. Blaes Environmental coordinated and managed the project, performed field measurements, collected, scaled and properly transported the soil and groundwater samples to the analytical laboratory, and prepared this report. Cascade Drilling provided the drilling, soil sampling, and groundwater sampling equipment and procedures. Sequoia Analytical provided laboratory analysis of soil and groundwater samples collected at the site.

2.0 BACKGROUND INFORMATION

This section presents known information regarding the background of the site and presents a summary of previous environmental work conducted at the site. The information was obtained from Blaes Environmental file records and the records of Amerco/U-Haul.

2.1 SITE BACKGROUND

2.1.1 Site Location

U-Haul Facility #710-52 is located in northern Alameda County on the southwest corner of San Pablo Avenue and Addison Street in Berkeley, California. The site is located geographically on the United States Geological Survey (USGS) 7.5-Minute Series Topographic Map, Oakland-West Quadrangle, California (1968).

2.1.2 Present Site Land Use and Physiography

The site lies at an elevation of approximately 50 feet above mean sea level (MSL) and is comprised of one parcel that contains a total land area of approximately 0.50 acres. Natural surface drainage in the area is toward the west (USGS topographic map. 1968). On-site surface water drainage has been altered by development to flow towards San Pablo Avenue to the east. The property consists of an asphalt paved lot with two single-story, wood frame buildings. The northern building is used as an office and show room. The southern building is used for storage and hitch installations. The site features are shown on the Site Plan presented as Figure 2.

2.1.3 General Lithology of the Site

Regionally, the subject site lies near the eastern edge of the San Francisco Bay in the northwestern part of Alameda County. Sedimentary deposits in Alameda County comprise three distinct, Quaternary-age depositional environments. One, forming a transgressive sequence of alluvial fan and fan-delta facies, has been mapped in the western one-third of the county. The second, forming only alluvial fan facies, has been mapped in the Livermore Valley and San Joaquin Valley in the eastern part of the county. The third, forming a combination of Eoalian dune and estuarine facies, is restricted to the Alameda Island area in the northwestern corner of the county (Helley and Graymer, 1997). As part of this investigation, native soil at the site was composed predominately of stiff clays with traces of coarse-grained sand down to a depth of approximately 21 feet below the ground surface (bgs). Copies of the soil horing logs are provided in Appendix B.

2.1.4 Depth to Groundwater in the Site Area

Groundwater was not encountered during the UST removal program conducted in June 1996. As part of this investigation, groundwater was encountered at approximately 20 feet bgs.

2.2 SUMMARY OF PREVIOUS WORK

On June 10, 11, and 12, 1996, Blaes Environmental conducted a UST closure program at the site. The program involved the removal of one 10,000-gallon fuel UST, one 550-gallon waste-oil UST, and all associated piping and dispensers. The locations of the former UST's and dispenser island are shown on the site plan in Figure 2.

Blaes Environmental collected a total of five soil samples for laboratory analysis during the tank closure program. The soil samples collected from beneath the former fuel UST, product piping, and dispenser were analyzed for total petroleum hydrocarbons – diesel range (TPHd) according to U.S. Environmental Protection Agency (EPA) Method 8015. The soil sample collected from beneath the former waste-oil UST was analyzed for total recoverable hydrocarbons (TRPH) according to EPA Method 418.1; halogenated volatile organic compounds (HVOCs) according to EPA Method 8010; and for TCLP Metals according to EPA Method 6010/7470.

Laboratory analyses of the soil samples collected during the UST removal program indicated no detectable concentrations of TPHd in samples collected beneath the former fuel UST. TPHd was encountered however, in the soil samples collected from beneath the former fuel dispenser and product lines at concentrations of 3.6 mg/kg and 2.0 mg/kg, respectively. Laboratory analyses of soil samples collected from beneath the former waste-oil UST indicated concentrations of TRPH of 8,300 mg/kg. HVOCs were not encountered in soil samples collected from beneath the former waste-oil UST, and TCLP Metals were not detected above maximum allowable limits.

3.0 INITIAL SITE ASSESSMENT PROGRAM

Based on the laboratory analytical results from the UST removal program and following a request from the TMD, Amerco/U-Haul authorized Blaes Environmental to initiate a program to investigate the impact (if any) of petroleum hydrocarbons in the soil and groundwater at the site. This section presents a description of the equipment, procedures, and findings of the site characterization program.

3.1 INITIAL SOIL AND GROUNDWATER SITE ASSESSMENT INVESTIGATION

3.1.1 Health and Safety Meeting

Prior to initiating field activities, Blaes Environmental conducted a health and safety meeting at the site. Attendeds at the meeting included all of the field personnel including the driller and a Blaes Environmental staff member. During the meeting, the Health & Safety Plan was reviewed, discussed, and signed by all personnel. The field program was conducted in strict adherence with the provisions described in the site-specific Health & Safety Plan.

3.1.2 Temporary Groundwater Sampling Point Installation

On March 24, 2005, Cascade Drilling advanced four soil borings for the purpose of collecting soil samples and/or installing temporary groundwater sampling points. Soil boring activities were conducted utilizing a truck-mounted, GcoProbe 6600 direct-push drill rig. The geoprobe rig was outfitted with push rods four feet in length. Soil borings SB-1 and SB-2 were advanced in the approximate center of the former waste-oil and former fuel USTs, respectively. Soil samples were collected at 5-foot intervals upon contact with native soils, and continued until groundwater was encountered. Once in the saturated zone, the borings were advanced an additional 10 feet without collecting soil samples. Due to the low conductance of groundwater through the soil, a hydro-punch was left in place overnight to allow groundwater to enter the boring for sample collection. Soil borings SB-3 and SB-4 were advanced approximately 25 feet west of the former waste-oil UST. No soil samples were collected from borings SB-3 and SB-4. The borings were advanced directly into the saturated zone, and temporary well points were installed and left overnight to allow groundwater recharge.

3.1.3 Groundwater Sampling

On March 25, 2005, Blaes Environmental and Cascade returned to the site. Groundwater was encountered in borings SB-3 and SB-4. Recharge did not occur in borings SB-1 and SB-2. Groundwater samples were

collected from borings SB-3 and SB-4 using a peristaltic pump. Each groundwater sample was pumped directly into laboratory-supplied glass containers. The sample containers were sealed with a Teflon-lined cap, labeled, and placed on ice in a cooler. A written record of each sample was entered onto a chain-of-custody document for transport to Sequoia Analytical for laboratory analysis.

3.1.4 Analytical Methods

Soil samples collected from borings SB-1 and SB-2 at the centers of the former fuel and waste-oil USTs were analyzed for TPHd and total petroleum hydrocarbons – oil range (TPHo) according to EPA Method 8015; and for total petroleum hydrocarbons – gasoline range (TPHg), and volatile organic compounds (VOCs), including fuel oxygenates, according to EPA Method 8260. Groundwater samples were not collected from borings SB-1 and SB-2.

Groundwater samples collected from borings SB-3 and SB-4 were analyzed for TPHg and VOCs (including fuel oxygenates) according to EPA Method 8260. Soil samples were not collected from the SB-3 and SB-4 borings.

3.1.5 Laboratory Analytical Results

Laboratory analyses of soil samples collected from boring SB-2 located near the center of the former waste-oil UST, indicated TPHd at concentrations of 2.3 mg/kg at a depth of 10 feet bgs and a concentration of 3.2 mg/kg at a depth of 15 feet hgs. VOC analytes were not detected in the soil samples collected from boring SB-2. Additionally, petroleum hydrocarbons were not detected in the soil sample collected from the approximate center of the former fuel UST, boring SB-1. A summary of soil laboratory analytical results is provided in Table 1.

Groundwater laboratory analyses of the sample collected from boring SB-3 (approximately 25 feet west and to the north of the former waste-oil tank) indicated Methyl tert-butyl Ether (MTBE) at a concentration of 0.77 ug/L. No petroleum hydrocarbons or additional VOCs were encountered in the groundwater sample collected from boring SB-3. Laboratory analyses of the groundwater sample collected from boring SB-4 (approximately 25 feet west and to the south of the former waste-oil tank) indicated TPHg at concentrations of 76 ug/L, and MTBE at a concentration of 43 ug/L. No additional petroleum hydrocarbons or VOCs were encountered in the groundwater sample collected from boring SB-4. A summary of groundwater laboratory analytical results is

provided in Table 2. A copy of the laboratory analytical report and associated chain-of-custody record, is provided in Appendix C.

3.1.6 Temporary Well/Boring Abandonment

Upon completion of groundwater sampling activities, each temporary PVC well casing was removed from the individual soil borings. Each soil boring was subsequently backfilled with cement grout through a tremie-pipe, and finished with a concrete surface completion.

3.2 SUMMARY

Laboratory analytical results of soil and groundwater samples collected during characterization program indicate limited impact of petroleum hydrocarbon constituents on native soil at the site. Soil samples collected from beneath the former waste-oil UST boring (SB-2) indicated TPHd at concentrations of 2.3 mg/kg at 10 feet bgs, and 3.2 mg/kg at 15 feet bgs. No other analytes were detected in the soil samples collected from the SB-2 boring. Additionally, petroleum hydrocarbon analytes were not detected in the soil sample collected from the former fuel UST soil boring (SB-1).

The groundwater samples collected from down-gradient borings SB-3 and SB-4 indicated concentrations of MTBE at 0.77 ug/L and 76 ug/L, respectively. Additionally, the groundwater sample collected from soil boring SB-4 indicated a concentration of TPHg at 43 ug/L.

According to the City of Berkeley, historic groundwater usage within city limits is minimal. Most of the usable groundwater resources are found in springs located in the hills east of the University of California Berkeley campus, although even these resources are unsustainable at high pumping rates. Due to the limited impact of petroleum hydrocarbons in soil and groundwater at the site, and given that the subsurface at the site is composed of low permeability clays. Amerco/U-Haul is requesting that a no further action letter be issued for the site.

TMD LETTER

APPENDIX A

Planning & Development Department Toxics Management Division September 14, 2004

Brett McClellan U-Haul International 2727 N. Central Avenue, 500 Phoenix, Arizona 85004

Subject:

Underground Storage Tank (UST) Investigation - U-Haul #710-52

Dear Mr. McClellan,

The City of Berkeley, Toxics Management Division (TMD) records indicate that the U-Haul site at 2100 San Pablo Avenue had fuel and waste oil tanks removed from the site in 1996. The "Underground Storage Tank Removal and Closure Report" July 31, 1996, was submitted to the TMD on September 13, 2004 by Blaes Environmental Management, Inc. (Blaes). The TMD finds that the results of the evaluation indicate elevated concentrations of petroleum constituents in soil and suggest potential impacts to groundwater.

In an effort to bring this project to closure, the TMD requires further investigation of the areas of concern. The TMD requires submittal of a site investigation work plan to evaluate the extent of contamination identified in the waste-oil tank area and further sampling of the former product lines. The TMD requires U-Haul to submit a work plan for this work within 90 days.

Within 90 days, provide to the TMD with a work plan to evaluate site conditions and develop an appropriate corrective action plan. The work plan should be prepared in accordance with relevant sections of California Code of Regulations, Title 23, Division 3, Chapter 16, Article 7 and Chapter 6.7 of the Health & Safety Code. Failure to provide the work plan as specified may result in a violation of the above-cited regulations, subject to civil penalties.

TMD staff are available to discuss the permitting procedures required in the City of Berkeley for underground tank closure. The TMD charges hourly fees, \$150/hr, for the evaluation and oversight of contaminated sites. The TMD will be billing you for five hours of staff time, \$750.00. Staff time was used to update TMD project tracking databases, create an unauthorized release form in the State Water Resources Control Board database (GeoTracker), to review the project history, and to prepare and distribute this letter. If you need more information, please contact me at (510) 981-7467.

Sincerely,

Geoffery Fiedler, Hazardous Materials Specialist II

with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2015 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
LITHONIA LIGHTING	747 BANCROFT WAY	SW 1/4 - 1/2 (0.464 mi.)	P77	124

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there is

1 CERC-NFRAP site within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/10/2015 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
COURTAULDS AEROSPACE	1608 4TH ST	NW 1/2 - 1 (0.681 mi.)	R89	177

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/10/2015 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

EXXON CO. USA #78465	2300 SAN PABLO AVENU	SSE 1/8 - 1/4 (0.207 mi.)	G40	55

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/10/2015 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent NPL

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, and dated 05/04/2015 has revealed that there are 5 CA RESPONSE sites within approximately 1 mile of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 05/04/2015 has revealed that there are 16 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

CA LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the CA LUST list, as provided by EDR, and dated 03/13/2015 has revealed that there are 28 CA LUST sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/10/2015 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 19 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 7 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Local Agency: BERKELEY, CITY OF

RB Case Number: 01S0744
File Location: Local Agency

Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor

Potential Contaminants of Concern: Tetrachloroethylene (PCE)

Site History: Dry cleaning solvent, perchloroethylene (PCE) recognized in shallow

soil and groundwater samples. City of Berkeley negotiated further investigation and approved installation and sampling of three new groundwater monitoring wells, extimated total depth of investigation between 20 and 30 feet below grade. Anticipated gradient is west to southwest. Offsite groundwater impacts have been evaluated for offsite vapor intrusion concerns and were found not to be of concern

for adjacent or downgradient properties.

Alternate Address: 2378/2366 SAN PABLO AVENUE

Alternate City, St, Zip: BERKELEY, CA 94702

Background Info: The site is located between Channing Way to the north and

Bancroft Way to the south on San Pablo Avenue. Julius Chase purchased the property in 1939 from Joe Long and operated an auto wrecking yard on site to approximately 1980. The property originally extended from San Pablo to 10th Street and consisted of a storage lot and a brick building used to support auto wrecking activities. The western half of the lot was sold and residential homes were built on 10th Street. In 1967 or 1968, most of the site was paved except, two small areas located west along the fence separating residential homes and this site. Soil contamination is located in an unpaved section of approximately ten (10) feet by forty (40) feet, along the property's western boundary adjacent to residential homes' backyards. An A&W Rootbeer restaurant was built on the eastern portion of the lot and operated until 1980. In 1980, the restaurant closed, and the eastern parcel was divided into two lots. Ali Baba restaurant and Greg's Auto Repair (in the brick building) which occupied the northern and southern portion respectively. The auto repair shop operated under Greg's Auto Repair (Mr. Greg Below, owner of the business) from 1980 to March 1983. In 1983, the shop was rented to Mr. Peter Mitchell. The shop operated from 1983 to 1988 under various names such as Mitchell's Auto Repair, Peter's Automotive Service, Peter Mitchell Imports and Berkeley Auto Repair. Droubi Nahla bought the property in April 1999. The site is fenced off. Currently, there are no business activities

at the site.

Background Info: K and S Management Company managed 32 units in a four-plex

building located between Hearst and Delaware Street. On June 1983, an inspection of the 32 units was conducted in response to a citizen complaint. Paint chips (lead-based) from water

blasting operation prior to repainting had accumulated around the bases of the building. The blasting company removed from all areas where paint chips were present and a few inches of soil to an appropriate landfill. All visible evidence of the blasting

was removed.

Comments Date: 11301983

Comments: Certified Site. In November 1983, post excavation samples were

Background Info: A succession of pesticide companies including, Able Termite

Control Company, Able Termite Control, Inc., Terminix Norcal, and its successor Terminix International occupied this property. These companies mixed pesticides with thinners. Peerless Electric Company bought the property from Terminix in 1981. Soil investigation conducted in 1983 identified aldrin, heptachlor, and chlordane at hazardous levels and the underlying groundwater detected chlordane and heptachlor. In 1984, the contaminated

soil was removed and the surface was sealed.

Comments Date: 01011983

Comments: Certified Site. A soil removal occurred in 1983. This

Comments Date: 01011983

Comments: certification was confirmed by a report prepared by the Auditor

Comments Date: 01011983

Comments: General. The Auditor General conducted an audit of the

TAKARA SAKE (Continued) S101293389

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to

represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as

> cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

dairy waste ponds.

Design Flow: Baseline Flow:

Reclamation: Not reported POTW: Not reported

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order

> should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to

represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as

cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

dairy waste ponds.

LOC Case Number: Not reported
File Location: Local Agency

Potential Media Affect: Other Groundwater (uses other than drinking water), Soil Potential Contaminants of Concern: Diesel, Gasoline, Stoddard solvent / Mineral Spriits / Distillates

Site History: Case history for Preliminary Endangerment Assessment can be found at

DTSC, with electronic information captured in DTSC's EnviroStor database. Petroleum corrective actions assigned to the City of

Berkeley, Toxics Management Division, by DTSC. Property has been used

commercially or industrially as a paint formulator.

Commercial/industrial activity at this site spans approximately 100 years. Corrective actions implemented to remove impacted soil. Added observation well in excavation area and added oxygen releasing material to soil/groundwater interface to enhance petroleum

degradation in groundwater. Fourth quarter monitoring results due in July 2013. Continued improvement of groundwater suggests corrective action completion has met goals and should be considered for no

further action.

Corrective Action Summary:

Event date: 01/01/1986

Event: Stabilization Measures Implemented, Groundwater extraction and

treatment (e.g., to achieve groundwater containment, to achieve MCL).

Event date: 04/20/1988 Event: **RFI** Imposition

Event date: 09/06/1990 Event: CA029ST

Event date: 09/06/1990

CA Prioritization, Facility or area was assigned a low corrective Event:

action priority.

Event date: 09/06/1990 Event: CA049PA

Event date: 02/28/1992

Event: RFI Workplan Approved

Event date: 04/14/1992

Event: RFA Completed, Assessment was an RFA.

Event date: 04/14/1992 Event: **RFA Completed**

Event date: 04/14/1992

Event: RFA Determination Of Need For An RFI, RFI is Necessary;

Event date:

Igration of Contaminated Groundwater under Control, Yes, Migration of Event:

Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of

significant changes at the facility.

Event date: 03/29/1994

Event: Current Human Exposures under Control, Yes, Current Human Exposures

Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant

changes at the facility.

Event: Stabilization Construction Completed

Event date: 08/04/1994

Event: Stabilization Measures Evaluation, This facility is not amenable to

stabilization activity at the present time for reasons other than 1-it appears to be technically infeasible or inappropriate (NF) or 2-there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at

the facility, or other administrative considerations.

Event date: 08/04/1994

Event: CA Prioritization, Facility or area was assigned a medium corrective

action priority.

Event date: 08/04/1994

Event: Stabilization Measures Evaluation, This facility is not amenable to

stabilization activity at the present time for reasons other than 1-it appears to be technically infeasible or inappropriate (NF) or 2-there is a lack of technical information (IN). FINDS:

Registry ID: 110000609262

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Info:

Completed Area Name: Berkeley Industrial Court

Completed Sub Area Name: Not reported Site Screening Completed Document Type: Completed Date: 02/15/2005

Comments: Site screening determined that PCBs, lead, nickel, and petroleum

> hydrocarbons had previously been detected in soil samples collected from the Berkeley Industrial Court site. The City of Berkeley has overseen sampling at the site in an effort to characterize chlorinated solvent occurrence in area groundwater.

Completed Area Name: National Starch and Chemical Company

Completed Sub Area Name: Not reported Completed Document Type: Site Screening Completed Date: 11/12/2004

Comments: Site screening concluded that chlorinated solvents were present in

groundwater beneath the National Starch site. The City of Berkeley has overseen sampling at the site in an effort to characterize the

occurrence of chlorinated solvents in area groundwater.

Completed Area Name: Berkeley Industrial Court

Completed Sub Area Name: Not reported

Preliminary Assessment Report Completed Document Type:

Completed Date: 04/01/1986

Comments: Confirmed DHS Preliminary Assessment information. Nine samples taken.

Completed Area Name: Temescal Business Center

Completed Sub Area Name: Not reported Site Screening Completed Document Type: Completed Date:

Comments: Site screening determined that historic site uses had included

> automobile manufacturing, rebuilding of marine engines, and storage of chemical metal etching waste. The City of Berkeley has overseen sampling at the site in an effort to characterize the occurrence of

chlorinated solvents in area groundwater.

Completed Info:

Completed Area Name: Berkeley Industrial Court

Completed Sub Area Name: Not reported Completed Document Type: Site Screening Completed Date: 02/15/2005

Comments: Site screening determined that PCBs, lead, nickel, and petroleum

> hydrocarbons had previously been detected in soil samples collected from the Berkeley Industrial Court site. The City of Berkeley has overseen sampling at the site in an effort to characterize chlorinated solvent occurrence in area groundwater.

Completed Area Name: National Starch and Chemical Company

Completed Sub Area Name: Not reported Completed Document Type: Site Screening Completed Date: 11/12/2004

Comments: Site screening concluded that chlorinated solvents were present in

groundwater beneath the National Starch site. The City of Berkeley has overseen sampling at the site in an effort to characterize the

occurrence of chlorinated solvents in area groundwater.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Land Records

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Most Recent Revision: 1999

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

NATIONAL WETLAND INVENTORY

NWI Electronic

NWI Quad at Target Property

Data Coverage

OAKLAND WEST

YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

	LOCATION	GENERAL DIRECTION
MAP ID	FROM TP	GROUNDWATER FLOW
1	1/4 - 1/2 Mile West	Not Reported
2	1/4 - 1/2 Mile SW	NW
4	1/2 - 1 Mile West	NE
A6	1/2 - 1 Mile SSE	Not Reported
7	1/2 - 1 Mile South	NE, SE
A8	1/2 - 1 Mile SSE	Not Reported
9	1/2 - 1 Mile North	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

APPENDIX D: QUALIFICATIONS

Marc A. Hachey, PG, CEG

Partner Associate

Education

M.E. in Geological Engineering - Missouri University of Science and Technology, Rollo, MO B.A. in Geology - Colby College, Waterville, ME

Registrations

Professional Geologist – CA, WA, AZ, OR and UT Certified Engineering Geologist – CA 40 Hour Haz. Mat. Certified

Summary of Professional Experience

Mr. Hachey has over 15 years of experience in the environmental, engineering geology, and geotechnical engineering service industries. He has significant experience in due diligence assessments for a variety of property types, and the needs and requirements of varied number of reporting standards, including ASTM standards, EPA's All Appropriate Inquiry (AAI), and customized client formats. Specifically, Mr. Hachey has performed Geotechnical Investigations, Geologic Mapping, Geotechnical Construction Monitoring, Phase I Environmental Site Assessments (ESAs) Environmental Transaction Screens, Soil Vapor Surveys and Phase II and III Subsurface Investigations.

Mr. Hachey has managed several large geotechnical and engineering geology projects throughout California, including: large school district bond projects, large-scale commercial expansion projects, and OSPHD-regulated new hospital projects in Modesto, San Rafael and San Jose. Geotechnical and engineering geologic capabilities include soil boring and rock core logging, engineering geologic mapping, landslide evaluation and repair, fault investigations, seismic design criteria calculation, geotechnical and engineering geologic report preparation, engineering consultation, and project/construction monitoring including earthwork observation and testing, foundation preparation observations, including pile driving, drilled piers and shallow foundations.

He has prepared hundreds of Phase I ESAs for a variety of development in California, Washington, Nevada, Idaho and Oregon. He has worked with multiple school districts on the monitoring, testing, and documentation of fill soil being imported to project sites and ensuring that the soil is free of contamination. He has experience mapping and sampling for Naturally Occurring Asbestos (NOA) within high probability geologic units throughout the San Francisco Bay area. Mr. Hachey has also been involved in Phase II investigations throughout Northern California, including former dry cleaners, gas stations, and other industrial facilities.

Finally, Mr. Hachey's diversity across residential, industrial, municipal, educational, medical, and commercial environments is a major contribution to Partner Engineering and Science's Associate team in the West region of the United States.

Steve G. Kovach

Project Manager

Education

B.A. - Botany, Miami University (Ohio) Minor - Conservation and the Environment

Summary of Professional Experience

Mr. Kovach has over thirteen years of experience in a broad range of environmental and engineering disciplines including: engineering and environmental due diligence services, industrial air, water, and wastewater permit compliance and monitoring, hazardous waste management and disposal, electrical utilities projects, environmental engineering projects, and wetland ecology research. Mr. Kovach has worked closely with regulatory agencies including the United States Environmental Protection Agency, California Department of Toxic Substance Control, California State Water Resources Control Board, California Integrated Waste Management Board, Bay Area Air Quality Management District, East Bay Municipal Utilities District, and the United States Department of Energy.

Specifically, Mr. Kovach has performed Phase I Environmental Site Assessments, Environmental Transaction Screens, Property Condition Assessments (PCAs), Regulatory Compliance Assessments, Asbestos sampling, Lead-based Paint sampling, Radon Studies, Lead-in-water sampling, permit compliance, hazardous waste storage and handling, air quality monitoring, and environmental emergency responses.

Finally, Mr. Kovach's diversity of experience with residential, industrial, municipal, and commercial environments is a major contribution to Partner Engineering and Science's Associate team in the San Francisco Bay Area and throughout the United States.

Registered Environmental Assessor, California, #07798 (program canceled in July 2012) LEED Accredited Professional, United States Green Building Council

Summary of Professional Experience

Mr. Grenfell has over 14 years experience in the environmental consulting industry and has worked in various disciplines, including regulatory compliance, EH&S, asbestos abatement, air monitoring, Tier II reporting, Phase II ESAs, and environmental due diligence practices, including Phase I ESAs and PCAs. Mr. Grenfell's primary area of expertise is in the environmental due diligence field, where he has performed hundreds of Phase I ESAs and has managed thousands of due diligence projects.

Mr. Grenfell has conducted and managed Phase I ESAs on industrial, office, multi-family, government, retail, and hospitality properties. Most notably, Mr. Grenfell has managed multiple large multi-site due diligence portfolios for varied and demanding clients, including a 300-site portfolio of Class A high-rise office buildings. He has developed scopes of work, mentored field personnel, identified environmental risks, and regularly provides detailed reports within strict deadlines.

Mr. Grenfell is familiar with all aspects of due diligence property assessments and reporting standards, including Fannie Mae DUS, Freddie Mac, HUD, and is especially knowledgeable on EPA's All Appropriate Inquiry and ASTM E1527-05. In addition, he has worked with diverse client groups with unique client-specific scopes of work and reporting requirements.

A sample of Mr. Grenfell's project experience includes:

- Completed hundreds of Phase I ESAs on multi-family properties, commercial office buildings, shopping centers, gasoline stations, hotels, dry cleaners, auto repair shops, and industrial facilities, including a former blueprint and film manufacturing facility. Areas of concern included former chemical storage/transfer areas, areas of drainage/deteriorated piping, historical groundwater dispersion wells, and former underground storage tanks systems.
- Managed numerous multi-site portfolios, including a 300-site portfolio of Class A highrise office buildings, at the time valued as the largest real estate transaction in history.
- Reviewed and evaluated hundreds of third-party Phase I, Phase II and Phase III reports
- Conducted eight Phase II Site Assessments at gasoline stations over a four-day period, coordinating and supervising the advancement of soil borings and collected soil and groundwater samples. Documented results in concise, well-written reports.

- Managed a compliance evaluation team at an 8,000 employee, 24-hour aircraft maintenance center, evaluating environmental regulatory compliance. Provided solutions and established protocols for ensuring compliance.
- Conducted 3rd-party reviews of over 150 gasoline stations, documenting previous report findings and providing a matrix listing issues and updated risk-based recommendations.

Currently, Mr. Grenfell provides management and senior review expertise of Phase I ESAs, transaction screens, and other product types, and is extensively involved in project management and client communications, maintaining an emphasis on providing exemplary client service. Mr. Grenfell is responsible for ensuring consistency and quality of due diligence services and ensuring that client-specific requirements are met, as well as the requirements of ASTM and AAI standards. Mr. Grenfell displays excellent written and verbal communication skills, effectively communicating environmental risks in a succinct fashion by distilling assorted information into pertinent findings and conclusions. Mr. Grenfell excels at providing effective risk-based results for multiple demanding client groups.

Mr. Grenfell has worked with national and regional lenders, banks, investors, equity stakeholders, and property owners, including:

- Bank of America
- Principal Real Estate
- Wachovia
- Wells Fargo
- Morgan Stanley
- Merrill Lynch
- Prudential
- Nationwide Life
- Bear Stearns
- Blackstone Group
- Principal Financial
- Countrywide
- Capmark Finance
- Cingular Wireless

Mr. Grenfell is also a LEED Accredited Professional (AP) who has studied energy auditing practices in commercial buildings and continues to explore energy efficiency and green business practices in the built environment.

Finally, Mr. Grenfell's diversity across managing projects across industrial, residential, retail, and commercial environments, as well as his diverse project experience, is a major contribution to Partner Engineering and Science's Project Management team.
